### Quick Overview

- 30% TH2, 30% Haygrazer, 15% Response WT, 15% Rugged ST and 10% Runner. This blend of top varieties offers improved performance under variable conditions.
- TH2 - Multi-leaf variety, selected on performance and quality.
- Rugged ST– improved germination under salt stress than conventional varieties.
- Response WT and Haygrazer - High Production Branch Root Alfalfas.
- Runner - Aggressive Creeping Root! Northstar Seed's leading alfalfa under dryland conditions.

### Adaptation

Northstar Seed has carefully selected alfalfa varieties that offer our customers increased performance characteristics under our challenging growing conditions. By combining five elite alfalfas we have increased the overall adaptability without sacrificing yield. Each alfalfa has its own unique characteristic. The combination of these variety strengths with similar maturity truly delivers a unique forage growing opportunity for alfalfa growers.

Whether seeding alone or in a mixture with grasses, ask your Northstar Seed Representative for more details.
