

EXPRESS TIMOTHY

Northstar Seed Toll Free

Neepawa, MB
Calgary, AB.

1-800-430-5955
1-800-805-0765

Quick Overview

- High forage yields
- Much leafier than most timothy varieties
- Fast regrowth after harvest
- Extremely winterhardy and persistent
- Widely adaptable
- Medium-late maturity
- Soft, palatable hay

Adaptation

EXPRESS is a medium to late maturing variety, better matching alfalfa bloom for harvesting optimum quality hay.

Timothy can handle moderate flooding and is useful in hay production. It can be used on medium to heavy soil types.

Timothy is well liked by livestock (mainly horses), both for the relatively soft texture of the hay. It is not well suited for production in drought prone areas as it requires moderate moisture to maintain growth reserves in the bulbous root system.

Notes
